

LIMITED CARS ON C. M. & B.

From Bucyrus to Marion
Have been Annulled.

(The Bucyrus Evening Telegraph, June 14, 1911) – The limited cars which have been running through from Bucyrus to Marion have been annulled indefinitely, on account of the power house at Stratford being out of commission. The limited special cars which have been going directly through to Marion only run to Bucyrus, and then make the return trip to Cleveland. The limiteds will not run to Marion until the power house is in running conditions again which will probably be nearly a month.

There is a large stone quarry located near the power house and it is said that the manager of the quarry set off a heavy blast of dynamite which completely wrecked the power house. The schedule of all the cars remain the same as before.
